The **PACE** Advantage

PACE has been known as the work-horse brand of the converting industry since 1983. Our rugged construction and customizable machine platform provides the versatility that adds value for our customers. Automotive, aerospace, and medical manufacturers have turned to us with their toughest parts and TRUST PACE, the industry leader for over 30 years.

Rugged Construction

PACE converting machines are built for strength and designed for durability. We use heavy-gauge aluminum plate, stainless steel, thick wall structural tubing, and other top quality materials and components. Our ruggedized construction minimizes maintenance and associated costs over the lifetime of the machine.

Versatility and Flexibility

Our base model machines can process the simplest jobs, or your most complex challenges – our products are built to deliver with precision and performance. All PACE machines are highly configurable, with various options and accessories available to match your specific needs.

Value

PACE machines deliver an ROI unmatched in the converting industry. Our machines are capable of reliable performance for years with an absolute minimum amount of maintenance. With affordable pricing and the fastest payback in the industry, it's no wonder most of our customers own more than one PACE machine.
